Getting Started: ResNet Wired

Mac OSX

The information in this guide will assist Mac users to set up their device for use on ResNet Wired.

1. Close any web browsers that may be open.

2. Go to the Apple Menu and click on System Preferences.

3. Double-click on Ethernet and the Local Area Connection window will open.

4. The Network window will open. Click on Ethernet from the left hand menu.

5. Now click on the Configure list and select Using DHCP. Click on Apply and close the open windows.
Connecting to ResNet Wired

6. Plug-in your network cable from your device to the network socket on the wall and open a web browser such as Internet Explorer.

7. Your browser should automatically open a ResNet Login webpage. If another page or a blank page is shown, type www.surrey.ac.uk in the address bar and press enter. This will then open the ResNet Login page.

8. Follow the on-screen instructions when prompted to register your computer.

9. That's it! You should now be connected to the ResNet Wired service.

Need Help?
Arrange for a ResNet Advisor to visit you in your room from Monday to Friday between 5pm and 8pm. To request a visit complete a ResNet Form available from your Court Reception. Alternatively call 01483 689898 to complete a form over the phone.
