Getting Started: ResNet Wired

Windows 8/8.1

The information in this guide will assist **Windows 8** users to set up their device for use on ResNet Wired.

1. If you are on the tile screen click desktop to get to the **Desktop Screen**.

2. Right click on the **Internet** options icon in the taskbar and then **Open Network and Sharing Centre**.

3. When the **Network and Sharing Centre** window opens, click on **Change Adaptor Settings**.

4. Double-click on **Ethernet** and the **Local Area Connection** window will open.
5. Click on the Properties button in the Window that appears.

6. When the properties window opens
   - Make sure Internet Protocol Version 4 is ticked.
   - Highlight or click on Internet Protocol Version 4 and click on Properties.

7. Make sure that Obtain an IP address automatically is ticked on both boxes. Click on OK to close this screen and save the changes.
8. You will return to the previous screen. Click **Close**.

**Connecting to ResNet Wired**

9. Plug-in your network cable from your device to the network socket on the wall and open a web browser such as Internet Explorer.

10. Your browser should automatically open a ResNet Login webpage. If another page or a blank page is shown, type www.surrey.ac.uk in the address bar and press enter. This will then open the ResNet Login page.

11. Follow the on-screen instructions when prompted to register your computer.

12. That’s it! You should now be connected to the ResNet Wired service.

---

**Need Help?**

Arrange for a ResNet Advisor to visit you in your room from **Monday to Friday between 5pm and 8pm**. To request a visit complete a **ResNet Form** available from your Court Reception. Alternatively call **01483 689898** to complete a form over the phone.
