Applied Research Methods for Health Sciences and Education
Module Code NURM142

Credits / Level of Study 15 credits / Level 7

Module Aims
The overall aim of this module is to enable students to understand how a range of research methods can be used to structure inquiry and develop the evidence base for applied health and social care practice and education.

Module Content
Data collection methods
Sampling Strategies
Data analysis methods
An introduction to statistical and qualitative data analysis procedures
Key principles of research ethics
IRAS process
Research governance
Reflexivity
Models of service user involvement

Pre-requisites of Study
Research Design and Methodology module.

Delivery of Module
Teaching and learning will be achieved through interactive seminar/lectures and practical group work and exercises as well as VLE support.

Assessment
Part 1: Development of a data collection tool
Part 2: A written assignment of 2500 words on a discussion and comparison of two research methods of their choice. Please consider which of these research methods you would use in practice and include the ethical considerations of this approach.

Key Information

Study Dates
October 2016: 10, 11, 12, 17, 18

*Please check our website to ensure that there have been no revisions to the course dates listed

Location
Duke of Kent Building, University of Surrey

Cost £920.00
