Complex Health Assessment
Module Code NURM109

Credits / Level of Study 15 credits / Level 7

Module Aims
To demonstrate autonomous, advanced practice when undertaking complex health assessments within an inter-professional and multi-agency context

Learning Outcomes
On completion of the module, the student should be able to:

- Act autonomously and responsibly when undertaking complex health and social care patient assessments.

- Apply their highly developed specialist knowledge in a range of health and social care assessments and procedures underpinned by an appropriate range of professional knowledge, competence and experience

- Be critically aware of the current evidence supporting the holistic and systematic assessment of patients with complex needs

- To critically evaluate and apply a range of assessment methods to identify patient cues to support their clinical decisions for patient referral and management.

- Communicate their patient assessment findings to other members of the inter-disciplinary team to facilitate a collaborative and integrated approach to complex patient care.

Assessment
OSCE
Clinical Log
Assignment: Word Count- 1500 words

Key Information
