Developing Skills in Contraception and Reproductive Healthcare
Module Code NUR3196

Credits / Level of Study  30 credits / Level 6

Module Aims
This module will enable practitioners to acquire the expertise and knowledge to become professionally confident in giving advice and effective care to clients of all ages regarding fertility control and related issues.

Module Content
Anatomy and Physiology of the reproductive tract
Human Sexuality
Contraceptive methods
Sexual Health Promotion and screening
Conception and pregnancy choices
Professional, medico- legal and ethical issues relating to service provision

Pre-requisites of Study
Professional Registration
Ability to study at Level 6

Delivery of Module
Lectures
Tutorials
Seminars
Student led learning
Clinically based learning: 42 hours plus 18 hours observation

The 42 hours of clinical learning need to be undertaken in an environment which has been educationally audited. There is a requirement to be observed and assessed by a registered nurse who has undertaken Mentorship training and is experienced in the delivery of contraception services. It is the responsibility of the applicant to ensure that these elements are in place prior to commencement of the Programme.

Assessment
Portfolio of Practice Evidence – Pass / Fail
Case Study

2,500 words (100% of the module marks)
