Leading and Managing Long Term Conditions  
Module Code NURM125

Credits / Level of Study  
15 credits / Level 7

Module Aims  
This module invites students to critically review their knowledge, skills and understanding of the management of long term conditions and reflect on how care is provided for these clients. This will be achieved through analysing key concepts and models of care and by challenging existing practices. Students will explore and debate new and contemporary ways of managing long term conditions which could deliver improvements in the care of this client group.

Learning Outcomes  
On completion of the module, the student should be able to:

- Critique and evaluate existing frameworks for managing long term conditions at global, national, organisational and individual levels and explore and evaluate the effectiveness of existing service delivery models.
- Demonstrate a critical understanding and evaluation of the roles and responsibilities and complexities of a whole systems approach in relation to the management of long term conditions to include advanced communication and leadership skills, integrated care pathways and referral systems.
- Demonstrate a deep understanding and evaluate the impact of cognitive and behavioural factors on people with long term conditions and develops critical responses to existing approaches to self-management and models of empowerment and advocacy.
- Critically evaluates the legal and ethical dimensions of managing long term conditions including fair access to services through procurement and commissioning and end of life issues.

Pre-requisites of Study  
None

Delivery of Module  
The module will be facilitated using an enquiry based learning approach with key note lectures from relevant health and social care professionals.

Assessment  
Students will present a study of a patient / patient client group and critically analyse the way in which services to support their health and social care needs are organised, delivered and managed. The study will conclude with recommendations for practice.

Students will be expected to critically evaluate the key issues in the management of long term conditions.  

Word Count: 3,000 words

Key Information  

Study Dates  
October 2018: 25  
November 2018: 2, 8, 22, 30  
December 2018: 6, 13
