Michel Foucault: Materialism and Education, Updated Edition
Mark Olssen

"Olssen … brings Foucault to life and sheds new light on understanding his work. In this new paperback edition he provides a clear and penetrating account of the relation between the concepts of 'freedom', 'history' and 'ethics' in relation to Foucault's materialism. Educationalists and scholars across the disciplines will welcome this interpretation of Foucault."
—Michael A. Peters, Professor, Chair of Education, University of Glasgow

"Olssen not only distills in brilliant and succinct language the core of Foucault's most important insights, he also uses Foucault's ideas as an theoretical resource to enhance and deepen the possibilities of education as a political and moral practice. This is a book that every student should read in order to understand how to link theory to practice, and educational thought to legacy and work of one of Europe's great thinkers."
—Henry A. Giroux, Global Television Network Chair Professor Communication and English Faculty of Humanities, McMaster University

Michel Foucault is arguably one of the most important thinkers of the twentieth century, and his works are some of the most difficult to grasp. In Michel Foucault: Materialism and Education, Mark Olssen offers one of the most accessible overviews of Foucault's thought available to educators and general readers, putting into context the relevance of Foucault's thought for contemporary educational philosophy and theory. Olssen adds important new insights to Foucault scholarship by bringing to light the influences of other thinkers such as Marx, Nietzsche, Gramsci, Habermas, and others on Foucault's development as a thinker, and their influence on the deep historical materialist strand that grounds and uniquely characterizes so much of Foucault’s thought.

Mark Olssen is Professor of Political Theory and Education Policy in the Department of Political, International, and Policy Studies at the University of Surrey. He is coauthor recently with John Codd and Anne Marie O’Neill of Education Policy: Globalization, Citizenship, Democracy (Sage, 2004); and editor with Michael Peters and Colin Lankshear of Futures of Critical Theory (Rowman and Littlefield, 2003).
