£10,000 Scholarships for Master's Degree Students

Considering a career in Operational Research?

Start by making a good decision: apply for a £10,000 scholarship towards your Master's degree.

Operational Research (OR) is all about applying analytical methods to help make better decisions, and studying its techniques will give you rigorous problem-solving skills that can make a real difference to any organisation. From influencing the design of sports stadiums to setting prices of airline tickets, your analysis can make millions of pounds worth of difference to any business. Learn more at www.learnaboutor.co.uk

We can offer help – £10,000 to get you started

Two Master's degree scholarships of £10,000 are available for students who demonstrate academic ability but require funding to continue their studies and fulfil

their potential in making a future contribution to OR. Successful candidates will be expected to engage with the OR Society by becoming a member and contributing to Society activities.

How to apply:

You must be eligible for UK fees and must apply for a Master's degree where at least 40% of the modules relate to OR methods. If you meet these requirements, discuss this scholarship with your chosen university's admissions officer who can submit an application on your behalf.

For more information contact: scholarships@theorsociety.com
Deadline for applications: 28 February 2018
