

Huawei is the world's largest telecommunications equipment manufacturer and a leading global provider of information and communications technology (ICT) infrastructure and smart devices, covering cross-telecom networks, IT, smart devices, and cloud services.

Huawei creates lasting value for its customers and colleagues, delivering exciting careers that help to connect more than a third of the people around the world through networks built with its partners. They are committed to bringing digital to every person, home and organisation for a fully connected, intelligent world.

In addition to its Reading headquarters, Huawei operates two joint innovation centres, ten centres of excellence and three R&D centres across the UK. Collectively, these sites employ a total of more than 1,600 people, and each location delivers inspiring opportunities for employees.

Huawei believes in investing in the future of talent in its business, and developing staff through training. It prides itself on offering stimulating opportunities for graduates to grow in their early careers, and hiring the very best through rapidly expanding recruitment programmes.

This year saw Huawei's intake of graduates more than double, and 2020 is set to see a similar expansion, with up to 50 spaces available for university leavers to launch their working lives in a role that will see them rapidly learn and progress in a cutting-edge environment.

Huawei's "Seeds of the Future" programme also offers students the opportunity of a lifetime, providing travel to China and opportunities to develop their science, technology, engineering and mathematics skills – as well as basic Mandarin – in locations like Beijing and Shenzhen.
