

# SCAN

## (STREET-SCALE GREENING FOR COOLING AND CLEAN AIR IN CITIES) WEBINAR

### ‘Healthy Green Streets’

08:00 - 10:00 (UK TIME)

19:00 - 21:00 (AUSTRALIAN TIME)

01 DECEMBER 2021

This free, public webinar is a part of the **SCAN** project, which provides an international platform for researchers to facilitate improved health and wellbeing in cities through knowledge exchange. It follows on from the ‘Green Street, Clean Air Street’ and ‘Green Street, Cool Street’ webinars that were held in March and June 2021. We will reflect on project activities and share findings and perspectives regarding the use of green infrastructure for urban cooling and air pollution mitigation.

This final event to round off the series will be co-chaired by **Professor Prashant Kumar** (University of Surrey, UK) and **Professor Pascal Perez** (University of Wollongong, Australia), and will feature a range of exciting talks from internationally recognised researchers in urban cooling, air quality and green infrastructure.

To register for this online event, please visit this link:
