

International Women's Day

#BREAKTHEBIAS

International Women's Day is a global event in March celebrating the social, economic, cultural and political achievements of women. The day also marks a call to action for accelerating gender equality.

The theme for 2022 is #BreakTheBias. Collectively every person can make a difference within their sphere of influence by taking concrete action to help build a more gender equal world. Together we can break the bias in our communities and workplaces.

We don't just celebrate the amazing work of women at Surrey in March, look out for details of events through the year ...

For further information on events and how Surrey supports gender equality go to:
